

SHEQ POLICY

5th July 2021

2ZLF Ltd is an innovative company that receives and treats contaminated aggregates such as street sweepings, road gully waste, oil interceptor waste etc., MRF Glass etc to recover the various fractions to avoid these materials being sent to landfill.

Our primary objective is to consistently meet and exceed our clients' expectations and requirements whilst fully complying with industry, technical, quality and environmental standards in order to qualify for repeat business from our clients.

We shall expand our industry position, within our areas of expertise, using an environmentally, health and safety conscientious approach.

As a service provider of environmental solutions our major environmental impact has been identified as the performance of our equipment. Consequently, mechanisms and systems have been put in place for measuring our performance, setting objectives and strategies and for identifying improvements in our performance in quality, health, safety and environmental areas. This is an integral part of our day to day conduct of business.

As a company we are committed to protecting the environment and preventing any activities that may have a significant impact on the environment.

Managers, supervisors, and employees at every level within 2ZLF Ltd shall continue to maintain the standards ISO 14001:2015; and ISO 45001:2018.

We shall regularly review our performance against the above standards and other regulatory requirements relative to our business and our client's business's.

All our clients, employees, sub-contractors, suppliers, and service providers are expected to share in this commitment to continuous improvement. We encourage and welcome any suggestions that may contribute to the development of our systems.

Signed:

M H OWEN
